

Blackberry Jam Candle Recipe

Recipe makes one candle.

Here's What You Need:
Ingredients

[White Beeswax](#)

[Blackberry Jam Fragrance Oil](#)

[Gel Wax](#)

[Spectrum Liquid Candle Dye- Purple](#)

[Spectrum Liquid Candle Dye- Black](#)

[Zinc Core Candle Wicks](#)

[POURING POT](#)

[THERMOMETER](#)

Other Ingredients & Equipment You'll Need:

Scale

Mixing Spoons

Pot (For Double Boiler)

Raspberries/Blackberries Mold (flexiblemolds.com)

Clamp Lid Jar

Here's How It's Done : Directions

Step 1: Prepare your embed. Weigh out 3 ounces of white beeswax. Melt the wax using a double boiler. Once melted add 0.3 ounces of the blackberry fragrance oil along with 3 drops of the purple and 2 drops of the black dye. Stir. Pour the wax into the berries mold. Allow the berries to setup before removing them from the mold.

Step 2: Add 10 ounces of the gel wax to a pouring pot. Melt the gel wax over low to medium heat until it is a syrup consistency. Do not allow the gel wax to get hotter than 230 degrees F.

Step 3: Next, add the colorant. Add one drop of black liquid dye and 4 drops of purple liquid dye. Stir to completely blend the colors.

Step 4: Add the fragrance oil. Add 0.6 ounces of the blackberry fragrance oil to the gel wax and stir.

Step 5: Prepare your jar. Place a zinc core wick to the bottom of your jar using hot glue to adhere it.

Step 6: Pour gel wax into the jar. Drop the blackberries into the wax. Keep a few of the berries to place on top.

Step 7: Make sure your wicks are centered and keep them in place as the wax cools.

Step 8: Allow gel wax to almost completely cool before placing the remaining berries.

Step 9: Trim the wicks back to $\frac{1}{4}$ ". Now you can burn your candles!
