Step 1: First, prepare your work station and the materials you will need. We suggest you wear protective clothing, gloves, and a hair net while making this recipe. You will also need to fill a spray bottle with rubbing alcohol.

Step 2: You will need to prepare the colored "confetti" soap first. There are 6 colors in this recipe. In a microwave, melt the Mango Butter Melt and Pour Soap. You will need about 175 grams of melted soap. You want to heat it 30 seconds at a time, until it is completely melted.

Step 3: We started with the orange confetti, adding 6 grams of Sweet Pea Fragrance Oil and 16 drops of FUN Soap Colorant Neon Orange. Mix well to fully incorporate all of the ingredients.

Step 4: Once your fragrance and color are added, pour the melted soap into one of the cavities of the 4 loaf molds and spray with rubbing alcohol to release any air bubbles. Note: You will only have a thin layer of soap, it will not completely fill the mold. We used this mold for this project because we found it easiest to remove from the mold. You can use a baking pan instead if you would like. The goal is to pour a layer about ¼ inch thick.

Step 5: Once the soap sets up, remove it from the mold. Then, cut it into small chunks. Repeat this process for each confetti color listed above. Once you have prepared all of the colors, mix them together in a bowl. This way you don't end up with too much of one color in one spot in the finished product.

Step 6: Now that you have your confetti prepared, prepare the white portion. Again, in the microwave, melt 656 grams of Mango Butter Melt and Pour Soap. Once melted, add 21 grams of Sweet Pea Fragrance Oil and mix to incorporate.

Here's How It's Done : Directions

Step 7: Next, pour some of the white Mango Butter Melt and Pour Soap into the Square Loaf Mold. You want to fill the mold about $\frac{1}{4}$ of the way full.

Step 8: Add some of the colored confetti to the mold while the soap is still melted. Then, spray with rubbing alcohol to release any air bubble that may have formed. Repeat this process until the mold is completely filled.

Step 9: Once the mold is filled, add some of the soap confetti to the top of the loaf as well.

Step 10: Allow your soap to setup before carefully removing it from the mold.

Step 11: Finally, use the mitre box and cutter to slice your soap.

Your Easter Confetti Soap is now ready to use! Enjoy!
