Other Ingredients & Equipment You'll Need:

Scale
Mixing Bowls (5)
Mixing Spoons
Microwave
Rubbing Alcohol
White Granulated Sugar
Paper Plate
1" Gumdrops Mold
(www.flexiblemolds.com)

Here's How It's Done : Directions

Prior to starting, clean and sanitize your work area and all of your utensils. We suggested you wear gloves, a protective apron, and a hair net while making this soap recipe.

Step 1: Use a scale to weigh out 413 grams of Natures Garden's Diamond Clear Melt and Pour Soap in a medium size mixing bowl.

Step 2: Once you have melted your clear mp soap base, add 4 grams of Goodie Goodie Gumdrops Fragrance Oil. Stir well to incorporate the fragrance oil.

Step 3: Next, separate your soap base. You will need 4 small mixing bowl. Add 103 grams of the melted clear soap base to each bowl.

Step 4: Now, add color. Use the guide below to color each bowl

Bowl 1: 6 drops FUN Soap Colorant Neon Green

Bowl 2: 2 drops FUN Soap Colorant Neon Pink plus 2 drops FUN Soap Colorant Ultramarine Violet

Bowl 3: 5 drops FUN Soap Colorant Neon Blue plus 1 drop FUN Soap Colorant Ultramarine Violet

Bowl 4: 8 drops FUN Soap Colorant Neon Orange

Step 5: Once colored, pour the soap into the cavities of the mold. Each colored bowl will make 4 individual gumdrop soaps. Allow the soap base to set up before removing them from the mold.

Step 6: In the next step you will be adding sugar to the gumdrops. You will need rubbing alcohol. Place the rubbing alcohol in a PET bullet bottle. Then, place a fine mist sprayer on top.

Step 7: In addition, you will need to place a thin layer of sugar on a paper plate. You want to sugar each gumdrop individually. Spray a gumdrop with rubbing alcohol. Then, roll it in the sugar. Repeat this process with each gumdrop.

Step 8: Place the soap gumdrops in one of the round silicone cupcake molds. We found this is a cute way to package your soap. The cupcake molds also make an adorable soap dish for your bathroom.

Your Gumdrop Melt and Pour Soap is now ready to use! Enjoy!
