### Other Ingredients & Equipment You'll Need:

16 oz. Glass Apothecary Jar  
Scale  
Mixing Spoons  
Hot Glue Gun and Stick  
Pot (For Double Boiler)  
Ice Cream Scoop  
Toothpick

## Here's How It's Done : Directions

**Step 1:** Weigh out 12 ounces of Joy Wax. Use a double boiler to melt the wax. Add 5 grams of the dark brown color block. Stir until the colorant is blended completely.

**Step 2:** Next, add 1.2 ounces of the Hot Fudge Brownies Fragrance Oil. Once again, stir.

**Step 3:** Place a CD wick in the candle jar using hot glue. Then, pour the brown wax into the jar. Center your wick and allow the wax to setup.

**Step 4:** Now, while your wax is setting up, prepare your cherry. So, melt 0.25 ounces of the Pillar of Bliss Candle Wax. Then, add a small amount of the red color block. You will use less than a gram. Stir to blend the colorant. Pour the wax into the cherry portion of the cupcake mold. Allow it to setup before you remove it from the mold. Set aside, for now.

**Step 5:** Prepare your ice cream scoop. You will simply need to use your ice cream scoop to create a scoop of ice cream using the Joy Wax. Then, using a votive wick pin, to place a hole in the center of the scoop. Place the scoop on top of the brown wax threading the wick through the center.

**Step 6:** Prepare your hot fudge. Weigh out and melt 1 ounce of Joy Wax. Add about 1 gram of the dark brown color block. Then, add 0.1 ounce of the Hot Fudge Brownies Fragrance Oil. Using a spoon, drizzle the wax on top of the ice cream scoop.

**Step 7:** At this time, you will need your cherry. Using a toothpick, place a hole in the center of the cherry. Then, thread the wick through it.

Once your hot fudge brownie candle has cured, it will be ready to use. Enjoy!
