## Here's How It's Done : Directions

### **Total Recipe Weights:**

96 grams Lavender Flowers Powder  
224 grams Kaolin Clay Powder  
24 drops Vitamin E Oil  
12 grams Vegetable Glycerin

**Step 1:** First, you will need a medium bowl. Then, in your medium sized bowl, weigh out 96 grams of your lavender powder using your scale.

**Step 2:** To your bowl, add 224 grams of your kaolin clay powder. Now, mix the ingredients ensuring that everything is fully blended.

**Step 3:** Next, we will add some vitamin E oil. So, use a disposable pipette to add 24 drops of vitamin E oil.

**Step 4:** Once again, blend everything together.

**Step 5:** You are now finished with your powdered portion. Scoop your powder into your white two ounce jars. Finally, place a lid on each jar.

**Step 6:** Next, we will begin preparing our vegetable glycerin. Place 12 grams of vegetable glycerin in eight of your ½ ounce bottles. Then, place a ribbed top lid on each bottle.

**Step 7:** To use your lavender face mask you will need a small mixing bowl. To prepare your mask add one tablespoon of powder, two tablespoons of water, and about 1/2 teaspoon of vegetable glycerin. Mix well. Note: We chose to package the powder and glycerin separately. By creating the mask without the water you will not need to add a preservative. This will allow you to prepare a quick product for your customers. Each two ounce jar will create approximately 4 facial masks.

**Step 8:** Simply, apply a thin layer of the mask to your face. Allow the lavender mask to harden. Then, rinse with warm water.
