

# Layered Melt and Pour Soap Recipe

*Recipe makes approximately 6 bars of soap.*

Here's What You Need:  
Ingredients

[Yogurt Melt and Pour Soap](#)  
[SLS Free Melt and Pour Soap](#)  
[Honeysuckle Fragrance Oil](#)  
[FUN Soap Colorant- Tomato Red](#)  
[FUN Soap Colorant- Ultramarine Blue](#)  
[SILICONE SOAP MOLD- 6 CAVITY STAR](#)  
[8 oz. Clear PET Bullet Bottles](#)  
[White Fine Mist Sprayers 24/410](#)

Other Ingredients & Equipment You'll Need:  
3 heat safe containers (for mixing soap and colorant)  
Scale  
3 Stainless Steel Mixing Utensils  
Cutting Board  
Large Knife  
Microwave  
Rubbing Alcohol

## Here's How It's Done : Directions

Total Weights for Blue Layer:

4.5 ounces SLS Free Melt and Pour Soap  
7 grams Honeysuckle Fragrance Oil  
5 drops FUN Soap Colorant- Ultramarine Blue

Total Weights for Red Layer:

4.5 ounces SLS Free Melt and Pour Soap  
7 grams Honeysuckle Fragrance Oil  
8 drops FUN Soap Colorant- Tomato Red

Total Weights for White Layer:

4.5 ounces Yogurt Melt and Pour Soap  
7 grams Honeysuckle Fragrance Oil

**Step 1:** Prepare your work area and gather all of your ingredients. Also, prepare a bottle of rubbing alcohol. This will be used to remove air bubbles and allow the layers to adhere.

**Step 2:** We poured our soap with the red layer to begin, however you can choose to pour any color you choose first. Begin by melting the soap for your first layer. Melt 4.5 grams of the SLS Free Clear Melt and Pour Soap in the first bowl. To the melted soap add 7 grams of the Honeysuckle Fragrance Oil and 8 drops of the Tomato Red FUN Soap Colorant.

**Step 3:** Now, fill each of the six cavities of the silicone star mold 1/3 of the way full with the melted soap. To release air bubbles, spray this layer with rubbing alcohol. Allow the soap to setup completely.

**Step 4:** Next, prepare the white layer in your second bowl. Melt 4.5 ounces of the yogurt soap base. Add 7 grams of Nature's Garden Honeysuckle Fragrance Oil. Before pouring the white layer, spray the red layer again with rubbing alcohol. Then, fill each cavity of the star soap mold until it is about 2/3 of the way full. Again, spray with alcohol and let the white soap setup before moving to the next step.

**Step 5:** Prepare your final layer. In your third microwave safe bowl, melt 4.5 ounces of the clear soap base. Once melted, add 7 grams of the Honeysuckle scent and 5 drops of Ultramarine Blue FUN Soap Colorant. Spray the previous white layer with rubbing alcohol. Then, pour your final blue layer in each cavity of the star silicone mold, filling them completely.

**Step 6:** Once your soap has setup, remove it from the soap molds.

**Your Layered Melt and Pour Soap is now ready to use! Enjoy!**
