

MP Embed CP Soap

Recipe makes approximately 4.5 pounds of soap.

Here's What You Need: Ingredients

Lye

AVOCADO Oil

CASTOR Oil- 16 oz.

COCONUT Oil-76

COCOA BUTTER DEODORIZED

SHEA BUTTER

Bubble Luscious Fragrance Oil

SODIUM LACTATE - 16 oz.

FUN Soap Colorant- Tomato Red 1 oz.

FUN Soap Colorant- Neon Pink 1 oz.

FUN Soap Colorant- Deep Purple 1 oz.

Titanium Dioxide Oil Dispersible

Square Loaf- Mold Market Molds

Diamond Clear Melt and Pour Soap

GOAT'S MILK Melt and Pour SOAP

Safety Glasses for Soap Making

Safety GLOVES for Soap Making- 1 pair

Safety MASK for Soap Making- 2 count

THERMOMETER

Other Ingredients & Equipment You'll Need:

Water

Cutting Board

Scale

Microwave safe glass container

Knife

Mixing Spoon (wood or stainless steel)

Spatula

Microwave

Rubbing alcohol in a spray bottle

Stick Blender

(3) Mixing bowls

Wax Paper

Ruler

Here's How It's Done : Directions

Recipe for Purple Swirls:

200 grams- Diamond Clear Melt and Pour Soap
10 grams- Bubble Luscious Fragrance Oil
35 drops Fun Soap Colorant Deep Purple

Recipe for White Swirls:

200 grams- Goats Milk Melt and Pour Soap
10 grams- Bubble Luscious Fragrance Oil

Recipe for Red Swirls:

200 grams- Diamond Clear Melt and Pour Soap
10 grams- Bubble Luscious Fragrance Oil
10 drops Fun Soap Colorant Tomato Red

Step 1: On a flat surface, lay out 3 larger pieces of wax paper.

Step 2: Prepare the Purple Swirls: Weigh out and melt 200 grams of Diamond Clear M&P Soap. Do this in the microwave in 30 second increments. Stir gently in between. Once your soap is melted, add the fun soap colorant deep purple and bubble luscious fragrance oil. Stir well.

Step 3: Next, pour all of the purple soap onto one of the sheets of wax paper. If you have any air bubbles in your soap, spritz the soap with alcohol. Allow this to set up at room temperature.

Step 4: Prepare the Red Swirls: Once again weigh out and melt 200 grams of Diamond Clear M&P Soap in the microwave. When melted, this time add the fun soap colorant tomato red and fragrance oil. Stir.

Step 5: Now, pour the red soap onto another piece of wax paper. Spritz with alcohol if you need to eliminate any bubbles. Allow to set up at room temperature.

Step 6: Prepare the White Swirls: Weigh out and melt 200 grams of Goats Milk M&P Soap in the microwave. Once your soap is melted, add the bubble luscious fragrance oil. Stir well.

Step 7: Finally, pour all of the white soap onto the last sheet of wax paper. If necessary spritz with alcohol to eliminate any bubbles. Allow to set up at room temperature.

Here's How It's Done : Directions

Cold Process Soap Ingredients:

431 grams of Water
154 grams of Lye
238 grams of Avocado Oil
79 grams of Castor Oil
238 grams of Coconut Oil 76
283 grams of Cocoa Butter
295 grams of Shea Butter
71 grams of Bubble Luscious Fragrance Oil
40 grams of Sodium Lactate

Cold Process Soap Colorants:

10 grams of Fun Soap Colorant Neon Pink
7 grams of Titanium Dioxide (for the whipped topping)

Step 1: Put on your safety gear.

Step 2: First, make your lye solution. Next, weigh out and melt the soaping ingredients. Once melted, separate out 30 grams and place it in one of your mixing bowls. To this add the 7 grams of titanium dioxide. Stir well to make a liquid. This will be for the whipped topping. Set aside.

Step 3: Once the lye solution has cooled, stir in the sodium lactate.

Step 4: While you are waiting on temperatures: Remove the purple, red, and white soap from the wax paper. Using your cutting board and knife, trim off any jagged edges. Next, cut 3 x 3 inch squares out of each color. Repeat this until all of the soap is sliced into squares. Then, gently curl the soap in a loose fashion. Making your curls loose will help the soap batter easily fall into them (without air bubbles). Finally, fill your square mold with all three colored swirls, but remember to save some red and purple curls for the whipped topping (if you can not make enough from the scraps).

Step 5: When both the soaping oils and the lye solution are ready, combine them together. Then, using your stick blender, blend to emulsify. Then, add your fragrance oil. Stick blend again to light trace.

Step 6: When your soap batter is at light trace, quickly grab your bowl with the titanium dioxide, and place 400 grams of soap batter into it. Then, to the remaining soap batter, add the

Here's How It's Done : Directions

fun soap colorant neon pink. Stick blend to incorporate, but you still want your soap batter to be on the thin side.

Step 7: Now, slowly pour the soap batter into the mold. Pouring slowly will help to eliminate air pockets in your soap. Once you fill to around the half way point in your mold, tap the mold gently several time to release any air bubbles. Then, continue to fill the mold. When the mold is filled, tap one more time to release any final air pockets.

Step 8: Next, stick blend the white soap bowl. Then, set aside

Step 9: Once the pink soap has set up enough, start to carefully heap the white soap on top to resemble whipped topping.

Step 10: When the topping is in place, place some of the m& p swirls (red and purple) on top for decoration.

Step 11: After 48 hours, place the soap into the freezer for about 4 hours. Then, remove the soap from the mold and let it reach room temperature. When ready, cut the soap into slices. Allow them to further cure before using.
