[White Fine Mist Sprayers 24/410](#)
[Natures Garden Soap Apron](#)
[Safety Gloves](#)
[Safety Mask](#)
[Safety Glasses](#)
[Basic Circle Mold](#)

Other Ingredients & Equipment You'll Need:

Witch Hazel (in spray bottle)
Mixing Bowls
Mixing Spoon
Scale

Here's How It's Done : Directions

Total Recipe Amounts:

300 grams Baking Soda
150 grams Citric Acid
43 grams Cornstarch
12 grams Kaolin Clay Powder
5 grams Red Rose Buds and Petals
5 grams Moscato Fragrance Oil
2 drops FUN Soap Colorant Tomato Red

This recipe is best prepared in non-humid climates.

Before you start, clean and sanitize your work area as well as all of your packaging materials. We also suggest wearing gloves, protective clothing, and a hair net while creating this shower steamer recipe. In addition, prepare your spray bottle, filling it with witch hazel.

Step 1: Begin by weighing out your baking soda, citric acid, Kaolin clay, and cornstarch. Using your hands, break up any clumps in the mixture. Mix the ingredients together.

Step 2: Now, add the Moscato Fragrance Oil and tomato red colorants. Use your hands to mix the ingredients together. You will want to be certain that the fragrance oil and color is fully and evenly mixed into the dry ingredients.

Step 3: Add 4 grams of the red rose buds and petals. Once again, use your hands to mix the ingredients together. Set the remaining rose petals aside, for now.

Step 4: Lightly spritz the mixture with witch hazel. Mix the mixture. Continue spritzing with witch hazel and mixing until the mixture feels like crumbly dough in your hands. Do not overspray.

Step 5: Prepare your molds. Sprinkle the remaining rose petals into each cavity of the basic circle mold dividing them evenly between the three.

Here's How It's Done : Directions

Step 6: Place the shower steamer mixture into each cavity of the mold. You will want to pack it as tightly as you can.

Step 7: Allow the steamers to set up before removing them from the molds.

We hope that you enjoy the moscato shower steamers!
