

## Simple Slime Recipe

*Recipe makes approximately 1- 8 oz. jar of slime.*

Here's What You Need:  
Ingredients

[Borax](#)  
[Da Bomb Soap Dye-Blue](#)  
[8 oz Bullet Bottle](#)  
[24/410 Black Smooth Disc Lids](#)  
[8 oz Clear PET Jars](#)  
[White Smooth Lids 70/400](#)

### **Other Ingredients & Equipment You'll Need:**

Mixing Bowl  
Stainless Steel Spoon  
Measuring Cups  
Measuring Spoons  
Maddie Rae's White Slime Glue

## Here's How It's Done : Directions

**Step 1:** First, prepare your borax solution. In your bullet bottle, add  $\frac{1}{2}$  cup of warm water. Then, add  $\frac{1}{4}$  teaspoon of Nature's Garden's borax. Place a black disc lid on the bottle. Make sure the lid is in the closed position and shake to mix the borax and water together. Set this bottle aside, you will need it in a later step.

**Step 2:** In a medium sized deep mixing bowl, add  $\frac{3}{4}$  cup of the glue. In addition, add  $\frac{3}{4}$  cup water and 5 drops of the blue Da Bomb Soap Dye. Mix everything together thoroughly.

**Step 3:** Now, you will need the borax solution that you prepared. Add about one tablespoon of the solution and mix. Then, add another tablespoon of the borax solution. Once again, mix. Repeat this process until you have the proper consistency. It is best to use your hands to mix. **Note:** If you do not add enough borax solution, your slime will be too sticky. If you add too much of the borax solution, your slime will be too stiff and not as stretchy. So, make sure you add only small amounts of the solution at a time.

**Step 4:** Place your slime in your clear jar and place a lid on top for storage.

We hope that you enjoy this simple slime recipe!
