Scale

## Here's How It's Done : Directions

### **Total Recipe Weights:**

517 grams of water  
189 grams of lye  
340 grams of Shea Butter  
122 grams of Sunflower Oil  
136 grams of Rice Bran Oil  
408 grams of Coconut Oil 76  
272 grams of Olive Oil pomace  
82 grams of Castor Oil  
85 grams of Sweet Orange Chili Pepper Fragrance Oil  
50 grams of Sodium Lactate

### **Soap Colorant Weights:**

7 grams of Titanium Dioxide  
7 grams of FUN Soap Colorant- Tomato Red  
5 grams of FUN Soap Colorant- Neon Orange

Clean your work area and supplies. It is suggested that you wear your safety gear prior to starting the soap making process.

If this is the first time you are making cp soap, you will want to read both of these classes: [Basic CP Soap Making Class](#) and [Soap Making Safety Class](#).

Please Note: The sodium lactate is added to the cooled lye water prior to mixing of the oils and butters. Carefully stir to incorporate. Then, proceed as normal.

After the addition and blending of the fragrance oil to the soap batter, weigh out and separate 717 grams of soap batter. Place this into one of your mixing bowls. Next, weigh out another 717 grams of soap batter into your other mixing bowl. To the first bowl, place your Tomato Red Soap Colorant. Stick blend to incorporate. Next, to the second mixing bowl, add the Neon Orange Soap Colorant. Stir well with a spoon to incorporate. Then, set both mixing bowls aside.

To the remaining soap batter, add the titanium dioxide. Stick blend well to incorporate. Once your batter is completely blended, take several scoops of the red soap batter and drop them into the white soap batter. Repeat the same action with the orange batter.

Now, for this step, you are going to do an in the pot swirl. Start by placing the spatula alongside the inside bottom edge of the bowl. Then, come straight up the center of the bowl. When you reach the top, pick the spatula up. Now, starting on one side, begin your swirls (using the spatula). Repeat on the other side. Do not over swirl.

## Here's How It's Done : Directions

Next, carefully pour the soap batter into the mold and insulate.

After 24 hours, remove the soap from the mold. Then, using your mitre cutter or knife, slice the bars. Allow them to further cure before using.
